

Pets & People: It's A Family Affair

Because having a pet is what turns a house into a home!

Kevin, Sarah, Leo & Dobbi Chabot

Health, Happiness & Home

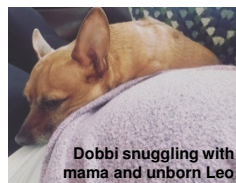

Kevin Chabot, his wife, Sarah, and their six year old dog, Dobbi, recently added a little bundle of joy to their family with the arrival of a baby boy named Leo.

"Having a dog and an infant can be a handful at times and messes are imminent. What we use to clean our home is very important to us, and we do not like harsh chemical cleaners in

our home. Recently our dog got sick and ended up a very messy accident on the carpet in my son's room. Most people would have to hire a carpet cleaning service or use toxic chemical cleaners, but thankfully we have a water ionizer, so we didn't have to go either route. Instead we used our 2.5 pH sanitizing water to disinfect the germs and bacteria and then used the 11.5 pH cleansing water to remove the stain! These are the two most powerful and effective non-toxic methods of disinfecting and removing stains that we have found. Our son is only 8 months old and not walking yet, so he's always on the floor playing and, just like any curious little one, he touches and puts everything he sees in his mouth, including his fingers.

Keeping our home clean and sanitary without using harsh chemical cleaners is important to us. Recent studies have revealed that breathing fumes of chemical cleaners are as toxic as smoking cigarettes. We use the 2.5 pH sanitizing water to clean our entire home, including both our son's and dog's toys, and we don't have to worry about them inhaling or ingesting harmful chemical residue. It's an effective sterilizer, yet it's chemical-free, eco-friendly and both pet and child safe. This technology has profoundly changed our life, by making us think more about hydration and making healthier lifestyle choices. In the three years we've been using the machine, we have noticed significant changes. My wife lost weight, which we believe

Dobbi snuggling with mama and unborn Leo

helped lead to the conception of our son, and, now that I am properly hydrated, my health has also improved. Dobbi loves his special water and won't drink anything else; he's become a water snob just like us! We're saving money too; we don't buy bottled water or water filters anymore and we no longer buy chemical cleaners. This machine has been life changing and, like Dobbi, this amazing water has become part of our family!

Brittney & Kiva Lampkin

The Family Dog...Is Family

"In 2017 I was working in property management, as a leasing consultant, for a 100-unit property. I wasn't happy with the 9-5 lifestyle and strongly desired a way out. Little did I know that an unforeseen health scare with my dog would end up completely changing my life. My dog, Kiva,

my healthy 4-legged furry companion unexpectedly became very lethargic. Kiva very quickly went from a happy, loving, and energetic dog, to an agonized pet who wouldn't leave the couch, eat, or drink. As time passed her eyes started sinking into her head and she would yelp every time I tried to move her. I was heartbroken! I was living pay-check to pay-check, but I stayed home from work with her for two days, calling every vet in a 20 mile radius, asking if they would accept a payment plan. I finally found a vet who was willing to take what I had left in my bank account. The vet told me it seemed Kiva was suffering from kidney or liver failure. Because I couldn't afford the necessary testing, I went back to work the following day feeling even more dismayed. That same day a tenant stopped by my office and could tell I was

upset and asked if everything was okay. After I told her what was going on, she asked me if I had heard of Kangen Water. I had no idea what she was talking about, however, I was willing to try anything to help Kiva, so she gave me a jug of her water and I immediately started nursing Kiva with it. After a few days she started to drink the water on her own, regained her appetite and started having regular bowel movements again. After only two short weeks, she was completely back to being herself and I became a Kangen Water believer! I saved enough to make a down payment and bought an Enagic K8. After what I saw happen with Kiva, I became passionate about sharing this incredible water with others. A few months later something else unexpected happened; I became pregnant. As a teen I was diagnosed with reproductive issues and told I would never have children, but I believe being properly hydrated allowed me to conceive a child.

I started sharing the water and information and the next thing I knew, people were buying their own machines from me. I was able to say goodbye to my job and now get to stay home with Kiva and my little bundle of joy full time! This has been the best investment I've ever made!
